In-House Demolition & Refurbishment Management Training

Courses recognised by Health & Safety Executive & CITB 'Approved Training Organisation' for grants. These bespoke courses offered as in-house to cover specific training needs at your venue, HSE docs, course notes & recognised certificates issued electronically. waynebagnall.co.uk

2 Day Demolition & Refurbishment Safety Management (recognised competence)

An enjoyable course for Managers, Engineers, Principal Designers, Principal Contractors, Supervisors & Contractors, or anyone tasked with planning & managing demolition/refurbishment projects. Practical knowledge from planning, pre-construction information, assessment, appointment, managing through to completion. It covers [BS6187:2011](#) for full & partial demolition, [BS5975:2019](#) Temp Works, The Construction (Design & Management) Regs 2015, L153 and reflects HSE & industry recognised guidance/standards for safe & effective demolitions.

Plus: 2 Day Asbestos Regs, Duty to Manage & Controlling Work (recognised competence)

An enjoyable course incorporating day 1 (UKATA) and designed for anyone tasked with planning, managing or removing asbestos. It covers the HSE asbestos survey guidance HSG 264 & management of asbestos in buildings L143 / HSG 227, specifying & interpreting asbestos surveys, practicalities of Reg 4; "Management of Asbestos in non-domestic premises" includes "NNLW" how it applies & the principles in HSG 247 Licensed guide & NEW HSG 248 Analysts guide" from planning, managing & controlling asbestos contractors safely & effectively.

As an alternative for F2F courses I developed remote ZOOM / TEAMS in-house training on Asbestos, Demolition & CDM, please tel; Wayne Bagnall **07712 767744** or email mwb@waynebagnall.co.uk

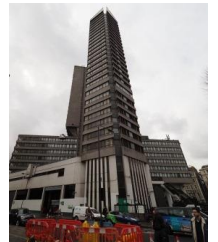

This 2-day Demolition course has been developed by me and constantly updated with information from Health & Safety Executive (HSE), Institute of Demolition Engineers (IDE), National Federation of Demolition Contractors (NFDC), Environment Agency & other safety organisations. We are an assured CITB approved training organisation (through UKATA), consequently recognised as CPD by HSE.

The number of attendees is limited to ensure individual attention underpinned by assessments at various stages throughout the course to ensure understanding. Comprehensive colour course notes & interaction with attendees is commented as one of the best features of this enjoyable & informative course.

Day 1 Demolition legislation, CDM 2015, Codes of practice & organisations:

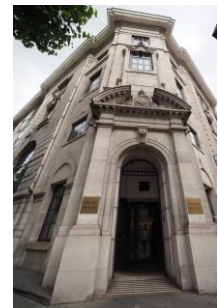

The aims & objectives of day 1 are to ensure knowledge and understanding of the legislative requirements for demolition & refurbishment with demolition covering CDM 2015 L153 & PD/PC roles, and Building Act 1984 etc. How SKTE (Skills Knowledge Training & Experience) and organisation capability assessments are examined and measured. Explains how BS 6187: 2011 Code of practice for full and partial demolition is applied & demystifying the 20 clauses and the 6 annexes. Explains temporary works BS5975:2019 Demolition organisations & training schemes (NFDC / NDTG / IDE etc) are explained.

30+ Storey City Centre Hotel

Day 2 Planning, techniques, on site works & an interactive case study:

The aims & objectives of day 2 are to develop understanding of demolition & refurb processes from planning, documentation, contracts, appointments, notifications and managing the works. The various demolition techniques including top down, remote mechanical, deliberate collapse & explosive are explored to ensure understanding of these applications. BS5975:2019 Temp works, sustainability, latest waste & permitting guidance including NEW Wood Recyclers Association Guidance to ensure a successful demolition from start to finish. Systematic completion procedures for a compliant H&S file.

Sensitive London Site(s)

By exploring real case studies, the knowledge gained is applied in small groups as role play as the Client, PD, PC and the demolition contractor. This helps reinforce the importance of information, expectations & understanding hazards & risks for safe & effective demolitions.

Attendees will understand the essential elements to plan, implement, manage & monitor demolition and or refurbishment projects from pre-construction information, the H&S Plan to completing a H&S file. After achieving the necessary standard & appropriate experience attendees should be able to specify, pre-qualify, make competent appointments, plan & oversee demolition & refurbishment projects that involve demolition.

Day 1 timings	Demolition/refurb legislation, BS 6187 & organisations	Day 2 timings	Planning & managing demolition & refurbishment projects
09.00	<i>Legislation, CDM 2015, L153 etc</i>	09.00	<i>CDM planning demolition-refurbish</i>
10.30	<i>Coffee/tea break</i>	10.30	<i>Coffee/tea break</i>
10.45	<i>Demolition, asbestos & environment</i>	10.45	<i>Techniques, site work & recycling</i>
12.30	<i>Lunch break</i>	12.30	<i>Lunch break</i>
13.30	<i>Bldg Act, & BS6187:2011/5975:2019</i>	13.30	<i>Case study briefing & workshop</i>
